Generic Attribute Profile (GATT)

+ Bluetooth Low Energy Server

Generic Attribute (GATT - > GATTS)

- 16-bit Service Class UUIDs¹ (unique for every Service)
 - > for members of Bluetooth SIG (A fee of \$2,500 per UUID will be charged for each)
- 32-bit Service Class UUIDs (unique for every Service)
 - > ?
- 128-bit Service Class UUIDs (unique for every Service)
 - > generate a random one (uuidgen -r)
